Chris Carter joined the Port of Vancouver USA in May 2015 and now serves in the role of Information Security Analyst. His responsibilities include establishing and maintaining secure information technology networks and supporting the ports IT infrastructure. Chris also provides end-user training in cybersecurity and presents on the topic of Cybersecurity to different audiences.

Prior to working for the Port of Vancouver, Chris worked for more than 18 years with companies and agencies in the Portland/Vancouver metro area. Chris received his Bachelor of Science in Information Technology with an emphasis in Software from Western Governors University and will finish his Master of Science in Cybersecurity and Information Assurance in March of 2021. Chris currently serves on the Board of Directors for the Maritime Transportation System Information Sharing and Analysis Center (MTS-ISAC) and is also a member of the American Association of Port Authorities' (AAPA) IT and Cybersecurity Committees.

Chris lives in Vancouver, Washington, with his wife and two children. When he's not defending the port from cyberattack, Chris enjoys spending time with family and being a hockey dad.
